

QUARTERLY  
OF  
APPLIED MATHEMATICS

EDITED BY

S. S. ANTMAN  
Z. ARTSTEIN  
H. T. BANKS  
H. COHEN  
J. D. COWAN

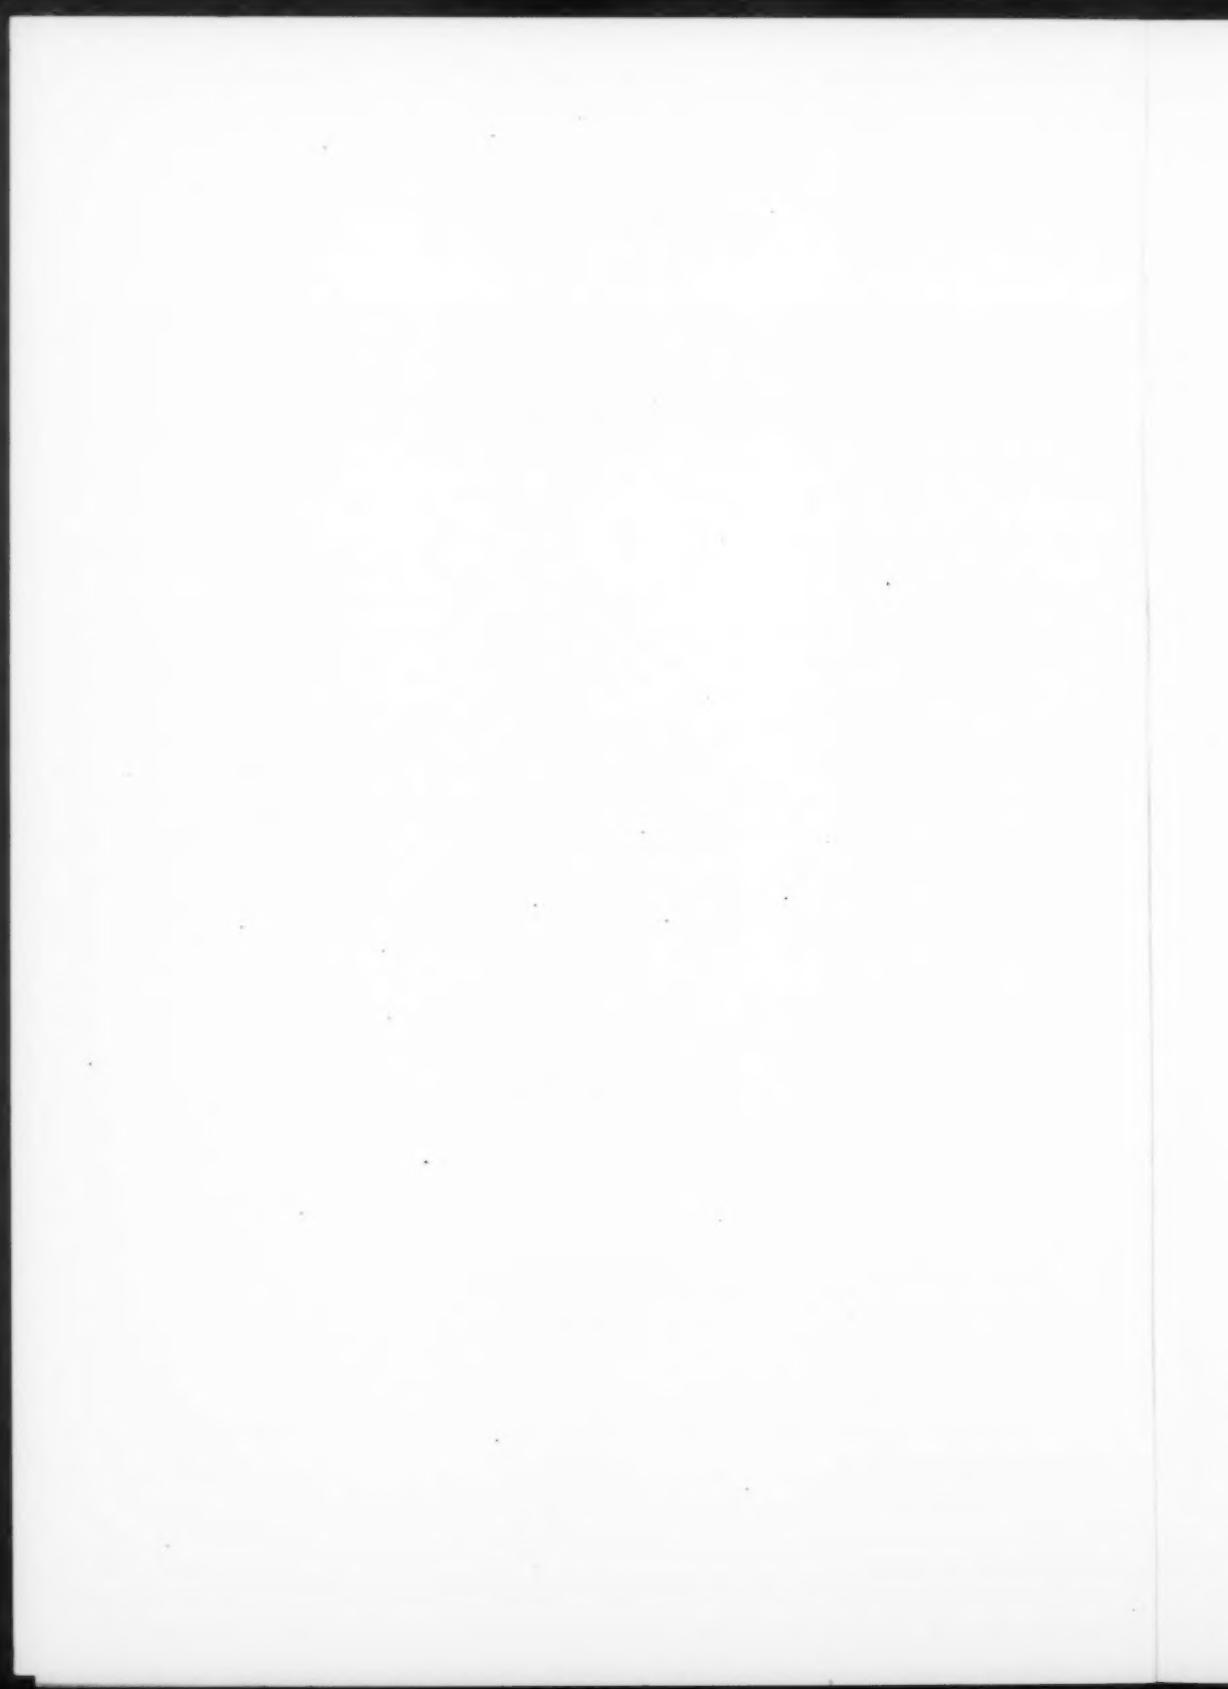

P. J. DAVIS  
G. IOSS  
J. HUNTER  
I. KONTOYANNIS

D. MUMFORD  
J. R. RICE  
J. G. SIMMONDS  
L. SIROVICH  
M. SLEMROD

WALTER FREIBERGER  
*Managing Editor*

CONSTANTINE DAFERMOS  
*Associate Managing Editor*

FOUNDER, AND  
MANAGING EDITOR 1943-1965  
W. PRAGER

## ANNUAL INDEX

Acho, Thomas M. *Derivation of eigenrelations for the Sturm-Liouville boundary value problems with interior singularities*, 375

Ambrose, David M. *Well-posedness of two-phase Darcy flow in 3D*, 189

Ammari, Habib, George Dassios, Hyeonbae Kang, and Mikyoung Lim. *Estimates for the electric field in the presence of adjacent perfectly conducting spheres*, 339

Antman, Stuart S., and J. Patrick Wilber. *The asymptotic problem for the springlike motion of a heavy piston in a viscous gas*, 471

Bayada, G., L. Chupin, and S. Martin. *Viscoelastic fluids in a thin domain*, 625

Boisvert, Jeffrey E. *See* Van Buren, Arnie L.

Boonklurb, R. *See* Chan, C. Y.

Bostan, Mihai. *Mild solutions for the relativistic Vlasov-Maxwell system for laser-plasma interaction*, 163

Chae, Myeongju, and Seung-Yeal Ha. *Stability estimates of the Boltzmann equation in a half space*, 653

Chan, C. Y., and R. Boonklurb. *A blow-up criterion for a degenerate parabolic problem due to a concentrated nonlinear source*, 781

Chupin, L. *See* Bayada, G.

Cimatti, Giovanni. *Existence of turning points for the response diagram of the Poiseuille flow with prescribed flow-rate*, 523

Dassios, George. *See* Ammari, Habib

Dhaliwal, R. S. *See* Singh, B. M.

Eskandari-Ghadi, Morteza. *See* Pak, Ronald Y. S.

Filho, M. C. Lopes. *See* Iftimie, D.

Fonseca, Irene, Gilles Francfort, and Giovanni Leoni. *Thin elastic films: The impact of higher order perturbations*, 69

Francfort, Gilles. *See* Fonseca, Irene

Gebauer, Bastian. *Sensitivity analysis of a parabolic-elliptic problem*, 591

Grasselli, Maurizio, Hana Petzeltová, and Giulio Schimperna. *A nonlocal phase-field system with inertial term*, 451

Grenander, Ulf. *On the mathematics of growth*, 205

Guo, Bao-Zhu, and Zhi-Chao Shao. *On well-posedness, regularity and exact controllability for problems of transmission of plate equation with variable coefficients*, 705

Ha, Seung-Yeal. *See* Chae, Myeongju

Ha, Seung-Yeal, Se Eun Noh, and Seok Bae Yun. *Global existence and stability of mild solutions to the Boltzmann system for gas mixtures*, 757

Hadzic, Mahir. *A constraint variational problem arising in stellar dynamics*, 145

van der Heijden, G. H. M., M. A. Peletier, and R. Planqué. *On end rotation for open rods undergoing large deformations*, 385

Hsiao, Ling, and Hongjun Yu. *On the Cauchy problem of the Boltzmann and Landau equations with soft potentials*, 281

Iftimie, D., M. C. Lopes Filho, and H. J. Nussenzveig Lopes. *Confinement of vorticity in two dimensional ideal incompressible exterior flow*, 499

Jochmann, Frank. *Decay of the electromagnetic field in a Maxwell Bloch system*, 99

Kang, Hyeonbae. *See* Ammari, Habib

Kohr, Mirela, and G. P. Raja Sekhar. *Existence and uniqueness result for the problem of viscous flow in a granular material with a void*, 683

Krutitskii, P. A. *On the mixed problem for harmonic functions in a 2-D exterior cracked domain with Neumann condition on cracks*, 25

Leoni, Giovanni. *On properties of some integrals related to potentials for Stokes equations*, 549

Leoni, Giovanni. *See* Fonseca, Irene

Lim, Mikyoung. *See* Ammari, Habib

Liu, Yue. *On the stability of solitary waves for the Ostrovsky equation*, 571

Lopes, H. J. Nussenzveig. *See* Iftimie, D.

Lucchesi, M., M. Silhavý, and N. Zani. *A note on equilibrated stress fields for no-tension bodies under gravity*, 605

Martín, Jorge San, Takéo Takahashi, and Marius Tucsnak. *A control theoretic approach to the swimming of microscopic organisms*, 405

ANNUAL INDEX

Martin, S. *See* Bayada, G.  
Martin, S., and J. Vovelle. *Large-time behaviour of the entropy solution of a scalar conservation law with boundary conditions*, 425  
Miyamoto, Yasuhito. *On the shape of the stable patterns for activator-inhibitor systems in two-dimensional domains*, 357  
Noh, Se Eun. *See* Ha, Seung-Yeal  
Pak, Ronald Y. S., and Morteza Eskandari-Ghadi. *On the completeness of a method of potentials in elastodynamics*, 789  
Peletier, M. A. *See* van der Heijden, G. H. M.  
Petzeltová, Hana. *See* Grasselli, Maurizio  
Planqué, R. *See* van der Heijden, G. H. M.  
Resnyansky, A. D. *See* Romenski, E.  
Rokne, J. *See* Singh, B. M.  
Romenski, E., A. D. Resnyansky, and E. F. Toro. *Conservative hyperbolic formulation for compressible two-phase flow with different phase pressures and temperatures*, 259  
Scarpetta, Edoardo, and Mezhlum A. Sumbatyan. *Some analytical results for acoustic scattering through a periodic array of elastic membranes*, 737  
Schimperna, Giulio. *See* Grasselli, Maurizio  
Sekhar, G. P. Raja. *See* Kohr, Mirela  
Shao, Zhi-Chao. *See* Guo, Bao-Zhu  
Šilhavý, M. *See* Lucchesi, M.  
Singh, B. M., J. Rokne, and R. S. Dhaliwal. *The study of dynamic behavior of functionally graded piezoelectric materials and an application to a contact problem*, 155  
Sumbatyan, Mezhlum A. *See* Scarpetta, Edoardo  
Takahashi, Takéo. *See* Martín, Jorge San  
Toro, E. F. *See* Romenski, E.  
Tsuge, Naoki. *Large time decay of solutions to isentropic gas dynamics*, 135  
Tucsnak, Marius. *See* Martín, Jorge San  
Turkyilmazoglu, M. *Non-linear and non-stationary modes of the lower branch of the incompressible boundary layer flow due to a rotating disk*, 43  
Van Buren, Arnie L., and Jeffrey E. Boisvert. *Accurate calculation of the modified Mathieu functions of integer order*, 1  
Vovelle, J. *See* Martin, S.  
Wilber, J. Patrick. *See* Antman, Stuart S.  
Xiong, Xinsheng. *See* Zhang, Zhengqiu  
Xu, Xiaoping. *Stable-range approach to the equation of nonstationary transonic gas flows*, 529  
Younes, Laurent. *Jacobi fields in groups of diffeomorphisms and applications*, 113  
Yu, Hongjun. *See* Hsiao, Ling  
Yun, Seok Bae. *See* Ha, Seung-Yeal  
Zani, N. *See* Lucchesi, M.  
Zhang, Zhengqiu, and Xinsheng Xiong. *The existence of eight positive periodic solutions for a generalized prey-predator system with delay and stocking*, 317
